Extend the lifetime of
your powder-actuated
tools

MAINTENANCE SERVICE

Extend the lifetime of your powder-actuated tools

BUILT TO LAST

Hilti tools are built to last, and our powder-actuated tools are no exception.

But even the toughest tools can use a professional checkup and tune-up once in a while – and that's what the experienced technicians at our Hilti Tool Service Centers are here for!

Now thanks to the new service indicator, the tool will let you know when it's time for a preventive maintenance service so you can:

- Extend tool lifetime
- Reduce the risk of unexpected downtime
- Keep repair costs under control
- Keep a record of the status of the tool

When the maintenance symbol appears on the service indicator, simply bring the tool to one of our Tool Service Centers. They'll take care of the rest.

Order your next maintenance service using the Hilti Connect mobile app and schedule the pick-up and return delivery to your jobsite with just a few clicks: you'll have the tool back as good as new within 3 business days – guaranteed, or the service will be free of charge.

And, of course, if you are a Hilti Fleet customer, the service is always free of charge!

OUR MAINTENANCE SERVICE INCLUDES:

- Tool diagnosis and inspection
- Replacement of worn and damaged components
- Cleaning and lubrication of all required parts
- Testing for safety and performance
- Service certificate
- Warranty extension
- New piston and buffer set
